

Thursday 13.30-15.00

Parrallel Session 1		
13.30 -15.00: Methods 1		
nr	Titel	Presenter
1	Cross-sectionally vs longitudinally measured predictors for biological age	Annelot P Smit
2	External validation of recommended multimorbidity indices for predicting mortality: a head-to-head comparison	Marije J Splinter
3	Variation of diagnostic accuracy across different healthcare settings	Natasja D Vijfschagt
4	When could real-world evidence inform regulatory decision making?	Marieke S Jansen
5	Simulated Application employed for evaluating models predicting prior risk using randomized controlled trial data	Guiyou Yang
6	Using negative control outcomes to identify unmeasured confounding in a self-controlled risk interval study evaluating the COVID-19 vaccine myocarditis safety signal	Sophie H Bots
Parrallel Session 2		
13.30 -15.00: Cardiovascular diseases		
nr	Titel	Presenter
1	The persistent underrepresentation of people with chronic kidney disease in cardiovascular trials: a systematic review and evidence map	Julia Colombijn
2	The use of sodium-glucose co-transporter-2 inhibitors or glucagon-like peptide-1 receptor agonists and the risk of lower limb amputations in Denmark	Nikki CC Werkman
3	Influenzavirus infection and acute myocardial infarction: a replication study	Annemarijn de Boer
4	The Dutch Cardio-Oncology Cohort: Incidence of cardiovascular disease predisposes to a higher cancer mortality rate.	Yvonne Koop
5	Long term prognosis in off-pump versus on-pump low risk CABG patients: Octopus follow-up study	Yvonne Koop
6	Mortality risk following first hospitalization for Lower Extremity Artery Disease.	Cindy P Porras
Parrallel Session 3		
13.30 -15.00: Lifestyle		
nr	Titel	Presenter
1	Dairy consumption and incident prediabetes: prospective associations and network models in the large population-based Lifelines study	Isabel AL Slurink
2	Longitudinal associations of circadian eating patterns with inflammation, insomnia, and fatigue in colorectal cancer survivors up to 2 years post treatment	Marvin Chong
3	Sleep and 24-hour activity rhythms and the risk of stroke: a prospective cohort study	Sanne JW Hoepel
4	Physical and behavioral factors mediate exercise effects on fatigue in patients with cancer: A meta-analysis of individual patient data	Romain J Collet
5	The association between time-use in physical activities, tv watching, sleep and cognitive performance among middle age and older adults: a cross-sectional isotemporal substitution analysis.	Rosa A Palazuelos-González
6	The Dutch Obesoogenic Built environment Characteristic (OBCT) index validation & improvement	Thao M Lam
Parrallel Session 4		
13.30 -15.00: Lifecourse		
nr	Titel	Presenter
1	The impact of modifiable risk factor reduction on future dementia burden: a microsimulation modeling study	Chiara C Brück
2	Diet quality at 3 years of age relates to lower BMI but not blood pressure at 10 years of age	Qihua Wang
3	The long-term effects of a school-based intervention to reduce overweight among children: a propensity score matching analysis within the Generation R Study	Famke JM Mölenberg
4	On the Edge of the Social Media Landscape: Adolescent Substance Use and their Parents' Rules	Hanan Bozhar
5	Retrospective validation of the World Falls Guidelines-algorithm in community-dwelling older adults	Bob van de Loo
6	Strategies to empower adolescents in healthy lifestyles related to obesity by participatory-research interventions: a systematic review and meta-analysis	Annemieke Wargers

Friday 9.00 – 10.30

Parrallel Session 5		
9.00-10.30: Methods 2		
nr	Titel	Presenter
1	Information bias in estimating vaccine effectiveness due to informed consent for COVID-19 vaccine register	C Henri van Werkhoven
2	Real-World Data as supplementary controls for the prospective randomized HOVON-103 trial in intensively treated elderly acute myeloid leukemia patients	Sjoerd J.F. Hermans
3	Estimating diagnostic accuracy under uncertainty about target disease status: a sepsis case study	Kevin Jenniskens
4	Comparing uncertainty in individual probability predictions with various models and model average: A case study	Haoyue Wang
5	Using an epidemiological lens to look at the reproducibility crisis	Michiel R de Boer
6	Factors influencing clinicians' utilization of risk prediction models: an interview study	Mary Ann E Binuya
Parrallel Session 6		
9.00-10.30: Clinical Epidemiology		
nr	Titel	Presenter
1	Disease activity guided tapering of rituximab in clinical practice: a retrospective cohort study of rheumatoid arthritis patients.	Maike HM Wientjes
2	Prediction models for hospitalization and length of stay in patients with chronic kidney disease: a systematic review and external validation study	Roemer J Janse
3	Disentangling variation in quality of care: a systematic review	Margrietha van der Linde
4	Mapping the research field of prognostic models in nephrology: a scoping review	Jet Milders
5	Comparison of 6xR-CHOP21 versus 6xR-CHOP+2R for advanced-stage diffuse large B-cell lymphoma: a propensity score weighted population-based analysis	Carolien CHM Maas
6	Developing and validating a clinical prediction model for stages of acute kidney injury in critically ill patients	Nam Nguyen-Hoang
Parrallel Session 7		
9.00 - 10.30: Environment		
nr	Titel	Presenter
1	Determinants and geographical variation of SARS-CoV-2 transmission risk in the Netherlands	Sophie L Campman
2	Biphenol and phthalate exposure during pregnancy and the development of childhood lung function and asthma. The Generation R Study.	Tarik Karramass
3	Work- and Health-related Events and Changes in Body Mass Index during the Covid-19 lockdown. Evidence from the Lifelines Cohort Study in the Netherlands.	Lluís Mangot-Sala
4	The impact of extreme temperatures on birth outcomes in the Netherlands: a nationwide population-based study.	Lizbeth Burgos Ochoa
5	Identification of five subgroups of work characteristics among young workers with different degrees of emotional exhaustion: a heterogeneity assessment using latent class analysis	Malte van Veen
6	Obesogenic environments and cardiovascular disease risk factors: A pooled analysis of five cohort studies	Paul Meijer
Parrallel Session 8		
9.00-10.30: Inequality & diversity		
nr	Titel	Presenter
1	The role of obesity in socioeconomic inequalities in mental health in childhood: The question of differential exposure or differential impact.	Maria Gueltzow
2	Longitudinal effects of perceived neighborhood social capital on self-rated health: a random effects within-between analysis	Vernon Cail
3	Sex differences in the intensity of statin prescriptions at initiation in a Dutch primary care setting: a population-based cohort study.	Pauline AJ Kiss
4	Socioeconomic inequalities in smoking attributable mortality Trends in Europe between 2000 and 2020	Nienke W Boderie
5	SARS-CoV-2 vaccination uptake in six ethnic groups living in Amsterdam, the Netherlands	Sophie L Campman
6	Early identification of individual and parent related determinants associated with later use of intensive child welfare services among Dutch children	Sanne Verhoog

Friday 11.00 – 12.30

Parallel Session 9		
11.00 - 12.30: Omics		
nr	Titel	Presenter
1	A Phenome-Wide Association Study of Cardiac Autonomic Function	Siqi Wang
2	FAMILIAL CO-AGGREGATION AND SHARED GENETICS OF CARDIOMETABOLIC DISORDERS AND TRAITS: DATA FROM THE MULTI-GENERATIONAL LIFELINES COHORT STUDY	Zekai Chen
3	Shared genetic architecture and causality between Autism Spectrum Disorder and irritable bowel syndrome, pain, and fatigue	Yiran Li
4	Mental illness and cardiovascular health: Observational and polygenic score analyses in a population-based cohort study	Rada R Veeneman
5	Statin use is associated with a higher prevalence and volume of coronary artery calcification: A genetic instrumental variable analysis	Mitra Nekouei Shahraki
6	Epigenetic clock-derived age acceleration is associated with lung function in the population-based Lifelines cohort study	Tigist Demsew Adane
Parallel Session 10		
11.00 - 12.30: Oncology		
nr	Titel	Presenter
1	The effect of risk-reducing salpingo-oophorectomy on breast cancer incidence and histopathological features in women with a BRCA1 or BRCA2 germline pathogenic variant	Annechien Stuursma
2	The association between clinical indicators of accelerated aging and the risk of developing a second primary cancer in adolescent and young adult (AYA) cancer survivors in the Netherlands	Daniël J van der Meer
3	The Bethesda System for Reporting Thyroid Cytopathology: Retrospective Analysis of Incidence, Sensitivity, Specificity and Risk of Malignancy in the Netherlands	Hannelore Coerts
4	External validation and clinical utility assessment of the PREDICT breast cancer prognostic model in women with node-negative breast cancer diagnosed under age 40	Yuwei Wang
5	INCIDENCE TRENDS OF HPV-RELATED CANCERS IN THE NETHERLANDS, 2000-2019	Ellen Olthof
6	Quality of life after different axillary treatments in women with breast cancer	Noelle JMC Vrancken Peeters
Parallel Session 11		
11.00-12.30: Infectious Diseases		
nr	Titel	Presenter
1	Association between adverse events after COVID-19 vaccination and anti-SARS-CoV-2 antibody concentrations in the VACCINE Study COvid-19 (VASCO)	Minke R Holwerda
2	Lyme arthritis in the knee in a Lyme endemic area in the Netherlands	Tizza P. Zomer
3	Development and external validation of prediction models for critical outcomes of unvaccinated COVID-19 patients based on demographics, medical conditions and dental status	Naichuan Su
4	External validation of six COVID-19 prognostic models for predicting mortality risk in older populations in a hospital, primary care, and nursing home setting	Anum Zahra
5	Impact of a pneumococcal polysaccharide vaccination program on invasive pneumococcal disease in elderly in the Netherlands	Annabel Niessen
6	Status of onchocerciasis (river blindness) elimination in Africa: results from a systematic review	Ananthu James
Parallel Session 12		
11.00 - 12.30: Neurocognitive & mental health - Chair		
nr	Titel	Presenter
1	Psychosocial factors, health behaviors and the incidence of cancer: a summary of IPD meta-analyses by the PSY-CA consortium	Maartje Basten
2	Health-related Quality of Life during the first 4 years after Non-Muscle Invasive Bladder Cancer Diagnosis: Results of a Large Multi-centre Prospective Cohort	Ivy Beeren
3	The impact of mental disorders during education on work participation: a register-based longitudinal study on young adults with 10 years follow-up.	Fabio Porru
4	Using real-world general practitioner data to study the diagnosis and management of dementia: rationale and design	Brenda N Baak
5	Benzodiazepine use in relation to long-term dementia risk and imaging markers of neurodegeneration: a population-based cohort study.	Ilse vom Hofe
6	Plasma Alzheimer's disease markers and MRI load of vascular pathology and neurodegeneration: the SMART-MR Study	Emma L. Twait
